

Senior Associate Patent Attorney

Software & electronics | Hybrid working (Windsor/London/remote)

We're looking for a dual qualified patent attorney to join us as a Senior Associate, focusing on AI technology.

We're a fast-growing IP firm, focusing mainly on patenting in software and electronics, with expertise in AI, robotics, cybersecurity and space technologies. Our clients are a mix of industry leaders in their respective fields and fast-growing start-ups – including three unicorn start-ups whom we've represented since incorporation – each with clever technology and exciting ideas that need protecting. We're looking to expand our team and its growing portfolio with a fully-qualified European and UK patent attorney, who would enjoy working directly with our loyal client base, having taken on several new clients recently.

Barnes IP has always allowed flexible working and will continue to do so; this role is up to 90% remote working with the option to be based in our Windsor or London office as required/desired (you can be in the office all the time if preferred). The role covers the full gamut of work, including original drafting, prosecution of both direct client and associate work, as well as related work, such as opinions and strategic advice. Our refreshingly different, integrated approach is varied and exciting in nature, offering rewarding opportunities along with continued professional development. We are also a signatory to the IP Inclusive Equality, Diversity and Inclusion Charter, and pride ourselves on offering merit-based equal opportunities in recruitment and career progression. We have assembled an excellent group of attorneys, paralegals and support staff, who work as a close-knit team.

ABOUT YOU

- You're attracted by joining a fast-growing dynamic young firm where, as a team player, you'll be able to share your creative ideas and experience
- You're a fully dual qualified Patent Attorney (EPA & RPA/CPA)
- You have strong analytical and problem-solving skills
- You have excellent written and verbal communication
- You like joining in with firm social activities and helping develop the firm in any way that results in providing better service to our clients
- It would be beneficial if you have previous experience with artificial intelligence, medical imaging, computer vision, cybersecurity, space tech and/or robotics

WHAT WE OFFER

- A refreshing, supportive and forward-thinking working environment that's fully paperless, built from best practice and always seeking improvements
- A varied and interesting caseload, working with established clients to develop a comprehensive worldwide patent portfolio but adding significant numbers of new clients regularly so providing many interesting opportunities
- Relaxed, friendly and sociable work environment, whether you're based at home or in our Windsor or London offices
- Support from experienced attorneys that have active roles in the profession's qualifying exams and training and active roles contributing journal articles and to reference works (such as the Black Book)
- We will also consider applications from those wishing to work part time or flexibly

REMUNERATION & BENEFITS

Salary in excess of £79k based on qualifications and experience | Joining bonus of £10k (pro rata for part time) | Pension scheme membership on starting | 25 days' holiday rising to 30 with service | Private medical insurance including mental health cover | Travel insurance (Personal & Business) | Employee benefits package | Company electric car scheme
